

Portfolio

The Verso IM 50% Equity Income portfolio aims to generate a natural income as well as growth within a controlled level of risk. It applies a fixed core asset allocation via ultra-low cost index funds.

The portfolio will normally invest 50% in income producing growth assets (equities & property), however, this can be increased and decreased by 5% if seen to be favourable to do so. The remaining assets will be invested in defensive assets (bonds & money markets).

The portfolio is managed on a discretionary basis by Verso Investment Management LLP. This means that Verso investment managers will be able to modify the underlying investments and weightings within the portfolio so that it continues to meet its objectives.

Portfolio Characteristics

Portfolio Launch Date	1/1/2022
Underlying Fund Charge	0.26%
Portfolio Management Charge	0.17%

Verso IM Portfolio Risk Indicator

There are four portfolios within the Verso IM Income Portfolio range each designed to provide a different level of Risk and Return:

The Verso IM 50% Equity Income portfolio model represents level 3 within our risk scale.

The different levels have been created to align with the standard risk profile categories provided by the Finametrica © Risk Profiling System and your adviser can help you find the right portfolio for you and your objectives.

Capital at risk: All financial investments involve an element of risk. Therefore, the value of your investment and the income from it will vary and your initial investment amount cannot be guaranteed.
