Portfolio

The Verso IM 100% Equity portfolio aims to generate above inflation returns over the long term (5+years), through a combination of capital growth and income. The portfolios are constructed using low-cost funds where possible to help keep overall investment charges to a minimum.

The portfolio will normally invest 100% in growth producing assets (equities & property), however, this can be increased and decreased by 5% if seen to be favourable to do so. The remaining assets will be invested in defensive assets (bonds & money markets).

The portfolio is managed on a discretionary basis by Verso Investment Management LLP. This means that Verso investment managers will be able to modify the underlying investments and weightings within the portfolio so that it continues to meet its objectives.

Verso IM Portfolio Risk Indicator

There are seven portfolios within the Verso IM Equity Portfolio range each designed to provide a different level of Risk and Return:

1	2	3	4	5	6	7
20%	35%	50%	60%	75%	90%	100%
Equity	Equity	Equity	Equity	Equity	Equity	Equity

The Verso IM 100% Equity portfolio model represents level 7 within the portfolio range.

The different levels have been created to align with the standard risk profile categories provided by the Finametrica © Risk Profiling System and your adviser can help you find the right portfolio for you and your objectives.
